How it works:

1. Every email you receive and send @rbap.org will send a copy to rbap.org.ph
2. rbap.org.ph becomes your official email archive in case you accidentally erase something in rbap.org
3. rbap.org.ph has 7 days of rotating backups.
4. You may also use rbap.org.ph as your backup email. As suggested in BSP Memo 2012-012
5. Please fill up the Registration Form and Fax the completed form together with the copy of the deposit slip of the payment.

*** For banks with multiple email addresses and you want a company wide email archiving solution, please contact us: One access, search all email accounts, email archiving.**

Email Archiving is the act of preserving and making searchable all email to/from an individual. Email archiving solutions capture email content either directly from the email application itself or during transport. The messages are typically then stored on magnetic disk storage and indexed to simplify future searches. In addition to simply accumulating email messages, these applications index and provide quick, searchable access to archived messages independent of the users of the system using a couple of different technical methods of implementation. The reasons a company may opt to implement an email archiving solution include protection of mission critical data, to meet retention and supervision requirements of applicable regulations, and for e-discovery purposes.
